Bendy Rail & Shower Curtain Specifications

Bendy Rails:

Able to be trimmed to the desired length

Can be curved to align with the corners of a shower base or bent to any custom shape

Suitable for corner or alcove shower bases

Easy to assemble*

Each bendy curtain rail KIT contains:

- white bendy rail
- wall bracket kit
- drop rod
- 12 hooks and gliders:

The bendy rails all come with a set of 12 hooks and gliders. Each curtain has 12 eyelets for the hooks, no matter the width of the curtain. If an additional curtain is used, then an additional hooks and glider pack would need to be ordered.

Curtains made of 100% breathable, woven polyester in white.

***Contractor Tip:** In many bathrooms, you can install glass screens at first and easily swap them out later, as needs change, for a bendable curtain rail and breathable shower curtain. You can bend these curtain rails to a radius as tight as 3", making them adaptable to almost any situation. That flexibility allows for tight bends at the ends of a rail to work around window frames, cabinets, or wall bump outs.
